SUMMARY

I am a Frontend Developer with proficiency in React.js, JavaScript, Tailwind CSS, Bootstrap, and GSAP for animations. I have practical experience using Appwrite as a backend-as-a-service (BaaS) for authentication and database management.

Currently, I am expanding my skill set by learning Node.js, Express.js, and MongoDB to build full-stack applications. I am interested about creating dynamic, responsive, and scalable web applications.

I am eager to apply my skills in both frontend and backend development to impactful projects.
